SKILLS

- ❖ Programming Languages: C++ (Advanced), Java (Basic), JavaScript (Intermediate)
- ❖ Web Technologies: HTML, CSS, Node.js, Express.js, EJS, REST APIs
- ❖ Cloud & DevOps: AWS, Kubernetes, Docker, Jenkins, ArgoCD, Prometheus, Grafana
- ❖ Databases: MongoDB, Mongoose
- ❖ Tools: Git, Linux, Python

EDUCATION

- ❖ B.Tech in Computer Science | SRM University CGPA: 7.0 | 2027
- ❖ XII (CBSE) | Little Angels School 75.6% | 2023

ACADEMIC PROJECTS

❖ Site Reliability Automation Pipeline

Built an automated reliability and deployment pipeline to streamline CI/CD workflows and improve infrastructure performance across cloud environments. Implemented real-time monitoring, auto-scaling, and observability to enhance system reliability and reduce resource waste.

Technologies: Jenkins, ArgoCD, Kubernetes, AWS, Python, Prometheus, Grafana

❖ YelpCamp | Website for booking camps online

Built a full-stack web application that allows users to create, review, and manage campground listings with authentication and authorization. Implemented RESTful APIs, secure login systems, and dynamic content rendering.

Technologies: Node.js, Express.js, MongoDB, Mongoose, EJS, Bootstrap, REST APIs, Authentication (Sessions & Cookies)).

❖ Chaos Monkey – Automated Resilience Testing System

Developed an automated chaos engineering solution to simulate infrastructure failures in Kubernetes environments and evaluate application resilience. Implemented controlled fault injection, monitored system recovery, and validated high availability using real-time observability tools.

Technologies: Kubernetes, Python, Docker, Prometheus, Grafana, Linux, Chaos Engineering

CERTIFICATION

❖ **SRE Fundamentals: Mastering Site Reliability Engineering**— Udemy (*Completed: 2026*)

❖ **The Web Developer Bootcamp** — Udemy (*Completed: 2025*)
